

***Food, Drinks, Databases (WS2425)***

<http://db.in.tum.de/>

Web-Interface: <http://pizza.db.in.tum.de/>.

**Exercise 1**

Write SQL queries to answer the following questions:

1. What is the name of the restaurant with id 41884?
2. Which meal costs 6.45 €?
3. How many meals / drinks cost between 10 € and 20 €?
4. What is the most expensive product?
5. What is the minimum/maximum/average price of Paulaner Spezi (0,5 l)?
6. How many products are offered for different sizes (S, M und L)?

**Exercise 2**

Now slightly more advanced questions:

1. Which restaurants offer the cheapest Pizza Margherita?
2. Which restaurant offers the best Pizza Margherita.  
(Based on restaurant ratings)
3. Which restaurants should you avoid ordering from when an Italian is present (because you can get a Pizza Hawaii but not a Pizza Regina)?
4. Which restaurants have trouble spelling Mozzarella correctly?
